

Participate and give us your opinion about the future of Concord

An extraordinary project is occurring in Concord

Thanks to the closure of the Inland Area of the Concord Naval Weapons Station, the City of Concord is working to create new housing, jobs, schools, parks, recreational areas and open space for the residents of this community.

All residents are invited to participate in the meetings and give us their opinion about this important project that will change the future of Concord.

There are seven reuse alternatives for the site.
Learn about them and give us your feedback!
